TOSSON SERVICES LLC

dba Tosson Environmental Analytics

Advanced Environmental Analytics & Nanoengineering Solutions — Capability Statement

Contact: Dr. Temitope D. Soneye, Founder & Principal
Address: 3118 Hannaford Drive, Mebane, NC 27302
Phone: 334-728-5402
Email: temitope.soneye@tossonllc.com
Web: tossonanalytics.com

UEI: KC31W9F8P7D6
CAGE: 1A1V5
SAM.gov: Active registration (renewal Mar 2027)
Business type: Small Business (SAM self-certified)
NC vendor: Registered, NC electronic Vendor Portal (eVP)

EXECUTIVE SUMMARY

Tosson Services LLC dba Tosson Environmental Analytics provides high-fidelity data modeling and subject-matter expertise at the intersection of nanotechnology and environmental remediation. Led by Dr. Temitope Soneye (PhD, Nanoengineering, North Carolina A&T State University, 2024), the firm translates complex chemical and physical data into actionable insight for water-quality and infrastructure projects — bridging academic research and field-ready solutions for agencies, municipalities, utilities, and prime contractors.

CORE COMPETENCIES

- **PFAS & Emerging-Contaminants Assessment:** contaminant data analysis (EPA UCMR 5, USGS Water Quality Portal), exceedance mapping, assessment-study scoping, sampling-plan design executed with certified laboratory partners, remediation pathway evaluation — including hydrothermal liquefaction (HTL) destruction of PFAS in biosolids and landfill leachate — plus nanomaterial-behavior and advanced-filtration consulting.
- **Environmental Data Analytics & Reporting:** custom data pipelines, interactive GIS/choropleth dashboards, monitoring-data management, hazard-index and severity scoring, and presentation-ready regulatory reporting in GeoJSON, CSV, and Excel. The firm's public platform tracks PFAS across all 100 North Carolina counties.
- **Environmental Monitoring & Documentation Support:** monitoring-program support, field-data QA under a documented three-gate QC program (below), and debris-monitoring documentation for disaster-recovery programs.
- **Data Integrity & Anomaly Review:** SQL/Python identification of anomalies in claims, billing, and environmental reporting — honed through data-analyst experience at Progressive Insurance — applied to utility billing integrity and agency data quality.
- **Regulatory Compliance Support:** analysis and technical support under EPA guidelines and North Carolina water-quality standards, including public-comment and rulemaking support on PFAS and emerging contaminants.

DIFFERENTIATORS

- **PhD-led insight:** doctoral research on PFAS destruction combined with a petroleum-engineering field background (BS, University of Ibadan; MS Biological Engineering, Auburn University).
- **A working platform, not a promise:** the NC PFAS intelligence platform at tossonanalytics.com is a live demonstration of the firm's data pipeline, mapping, and reporting capability.
- **Local watershed knowledge:** technical contributor to Clean Water for North Carolina on fracking risks and PFAS pathways in the Cape Fear and Haw River watersheds; based in Mebane, NC, in the Haw River watershed.
- **Agentic AI integration:** local AI systems accelerate data processing and predictive modeling for environmental risk assessment, with human-in-the-loop review of every deliverable.

NAICS CODES

Primary: 541690 — Other Scientific & Technical Consulting Services. Additional: 541620 Environmental Consulting Services · 541380 Testing Laboratories & Services · 541511 Custom Computer Programming Services · 541713 Research & Development in Nanotechnology. SBA size standard for the primary codes: $19M average annual receipts — the firm is a small business under each.

RELEVANT EXPERIENCE

The firm is newly registered for government work (SAM.gov, March 2026) and holds no prior government contracts. The following is the key personnel's and platform's relevant experience, offered on that basis:

- **NC PFAS Intelligence Platform (2025–present):** designed and operates a live platform integrating EPA UCMR 5 and USGS data for all 100 NC counties, with county analyses and regulatory tracking used statewide.
- **Doctoral research, NC A&T / JSNN (to 2024):** PFAS/PFOA destruction methods for contaminated sludge via alkaline hydrothermal liquefaction; publications in Environmental Science & Technology (2024), Water Research (2024), Bioresource Technology (2023), and NanoImpact (2023).
- **Technical consulting — Clean Water for North Carolina:** technical analysis and guest reports on hydraulic-fracturing risks and PFAS pathways for a statewide clean-water nonprofit.
- **Regulatory filings:** public comments filed as Founder & Principal, including EPA biosolids PFAS guidance (EPA-HQ-OW-2026-2509, Sep 2025) and the Carolina Lithium air-permit comment to NC DEQ (Oct 2026).
- **Corporate data analytics — Progressive Insurance:** data validation, controls, and anomaly detection on complex claims data (key-personnel experience of the Founder & Principal).

HEALTH, SAFETY & ENVIRONMENT (HSE) POLICY

A note from our Founder: at Tosson Services LLC, safety is not a box checked to satisfy a contract; it is a commitment to the people we work with and the environment we are trying to protect. A petroleum-engineering background taught us that "safety first" is the only way to operate, and we carry that into every data set analyzed and every site visit conducted.

Our policy is simple: everyone goes home whole. We treat data security and ergonomic health with the same rigor an engineer treats a pressurized valve, and stopping work to address a safety concern — physical hazard or data-integrity risk — is always the right move.

QUALITY CONTROL (QC) PROGRAM

You do not earn a PhD in nanoengineering by being "close enough." Our quality control is built on scientific rigor as a service. Because we handle data that impacts public health and water safety, every deliverable passes a three-gate validation system:

- **Gate 1 — Raw input verification:** we never assume data is clean; every set is scrubbed for anomalies before modeling begins.
- **Gate 2 — Model calibration:** analytics are tested against known baselines (including our published PFAS research findings) so outputs stay grounded in physical reality.
- **Gate 3 — Human-in-the-loop review:** no AI or algorithm gets the final word; every deliverable is personally reviewed by the Founder & Principal for technical accuracy and clarity before release.

SUSTAINABILITY STATEMENT

Tosson Services LLC exists because the world needs better ways to clean up the contamination it has already created. Sustainability is not a department here — it is the business model: a paperless office, an energy-efficient local computing environment, and impact through the work itself — assessment, data, and remediation planning that helps agencies, utilities, and communities solve the PFAS crisis. We live this mission in the Haw River watershed we call home, and treat client projects with the same care we give our own backyard.

CERTIFICATIONS & REGISTRATIONS — AS VERIFIED, OCTOBER 2026

- **SAM.gov:** active entity registration, Tosson Services LLC (UEI KC31W9F8P7D6, CAGE 1A1V5); small-business self-certification.
- **North Carolina:** registered vendor, NC electronic Vendor Portal (eVP). NC Small Business Enterprise (NCSBE) certification application in preparation (October 2026).
- **Availability:** teaming and subcontracting inquiries welcome; the firm responds directly to all initial inquiries within one business day.
